SUBJECT INDEX

Carcasses and meats

- Environmental and dietary effects on carcass characteristics in pigs 235
 Standard methods for carcass assessment in goats 149

Cattle

- Comparison of proven sires of 5 Holstein-Friesian strains 305
 Concentrate supplementation: performance of dairy cows 117
 Effects on first-lactation milk yield in buffaloes and cows 225
 Feed intake and starch proportion: digestibility and milk production 19
 Feed intake and starch proportion: rumen ingesta in dairy cows 37
 Genetic relationships between cow fertility traits by parity 337
 Part-lactation predictors of lactation yield and feed efficiency 9
 Prediction of 305-day milk yield 1
 Research in cattle production (book review) 285
 Selection on first-lactation yields 211
 Transport of steers: physiological and behavioural responses 63
 Trophoblastin in ruminant embryonic mortality 193
 Variance causes for first-lactation dairy production 95

Genetics and selection

- Aggressiveness of sows: genetic aspects 1
 Comparison of proven sires from 5 Holstein-Friesian strains 305
 Effects on first-lactation milk yield in buffaloes and cows 225
 Genetic relationships between cow fertility traits by parity 337
 Microelectronics in animal breeding. Working Group report 291
 Part-lactation predictors of lactation yield and feed efficiency in cows 9
 Prediction of 305-day milk yield of cows 1
 Selection on first-lactation yields in cattle 211
 Synthetic dam line in sheep 77
 Variance causes between paternal half-sibs for first-lactation dairy production 95

Horses

- Equine nutrition and feeding (book review) 288
 Forage and concentrate interactions in horses 263

International co-operation

- Microelectronics in animal breeding: E.A.A.P. Working Group report 291

Management and health

- Buck use to stimulate cycling in anovulatory goats 135
 Climatic environment, metabolism and infection in pigs 365

Climate changes: physiological responses in Finn ewes	179
Environmental temperature: effect on growing-finishing pigs	193
Transport of steers: physiological and behavioural responses	63

Nutrition

Advances in animal nutrition (book review)	286
Ascorbic acid: performance and foot-leg scores in boars	277
Birth weight and animal protein level in diet of piglets: subsequent performance	351
Concentrate supplementation: performance of dairy cows	117
Dietary energy concentration: effect on growing-finishing pigs	235
Dietary vitamin E supplementation: effects in stress-susceptible pigs	169
Feed intake and starch proportion: digestibility and milk production	19
Feed intake and starch proportion: rumen ingesta in dairy cows	37
Forages and concentrates interactions in horses	263
Sow feeding during pregnancy: productivity and culling	247
Voluntary food intake (book review)	187

Pigs

Aggressiveness of sows: genetic aspects	161
Ascorbic acid and breed effects on performance and legs in boars	277
Birth weight and animal protein level in piglet diets: subsequent performance	347
Climatic environment, metabolism and infection	365
Dietary vitamin E supplementation: effects in stress-susceptible pigs	169
Pregnancy feed intake effects on sow productivity and culling	247
Temperature and ration effects on growing-finishing pigs	235

Reproduction

Buck use to stimulate cycling in anovulatory goats	135
Fertility traits by parity: genetic relationships in dairy cows	337
Physiological response of Finn ewes to climate changes	179
Sheep reproductive behaviour (book review)	91
Trophoblastin in ruminant embryonic mortality	193

Sheep and goats

Buck use to stimulate cycling in anovulatory goats	135
Climate changes: physiological response in Finn ewes	179
Sheep reproductive behaviour (book review)	91
Standard methods of carcass assessment in goats	149
Synthetic dam line in a reciprocal cross	77
Trophoblastin in ruminant embryonic mortality	193
